**The Sky's the Limit Jan 22 2020 With his signature elan, Gaines weaves a gossipy tapestry of brokers, buyers, co-op boards, and eccentric landlords and tells of the apartment hunting and renovating adventures of many celebrities -- from Tommy Hilfiger to Donna Karan, from Jerry Seinfeld to Steven Spielberg, from Barbra Streisand to Madonna. Gaines uncovers the secretive, unwritten rules of co-op boards: why diplomats and pretty divorcees are frowned upon, what not to wear to a board interview, and which of the biggest celebrities and CEOs have been turned away from the elite buildings of Fifth and Park Avenues. He introduces the carriage-trade brokers who never have to advertise for clients and gives us finely etched portraits of a few of the discreet, elderly society ladies who decide who gets into the so-called Good Buildings. Here, too, is a fascinating chronicle of the changes in Manhattan's residential skyline, from the slums of the nineteenth century to the advent of the luxury building. Gaines describes how living in boxes stacked on boxes came to be seen as the ultimate in status, and how the co-operative apartment, originally conceived as a form of housing for the poor, came to be used as a legal means of black-balling undesirable neighbors. A social history told through brick and mortar, The Sky's the Limit is the ultimate look inside one of the most exclusive and expensive enclaves in the world, and at the lengths to which people will go to get in.**

**23 2022 As everyone knows, God created mankind to his image (Genesis 01:27). What mankind does not know is that God did not create man on Earth, but rather on MARS! When Mars could not sustain life anymore, mankind had to escape the planet and colonized Earth. Many years later, a study was written about the survival of mankind in Sol Four (Mars) and its struggle in Sol Three (Earth). We proved to be a species that has survived wars, slavery and other forms of abuse -- always holding on to our faith in God. "Overall Rating: 4 out of 5 stars. I will admit when I was first approached with the idea of this book it offset me. I am not religious. However, this book combines religion, science, and human nature and thought into a very lovely collection of stories and tales. I found that I enjoyed hearing about how human kind still holds principals so close to their heart. And it gave me hope for the future." Book Review: Under The Thelian Sky by Toni G. Sandwiched between the demise of the original *Star Trek* and the opening of the *Stars Wars* series on the big screen, *Space: 1999* featured a richly-visualized world where space was terrifying and mysterious, where not all problems were solvable by technology and the space travelers were very human. This title, which has aggregated sales of about 20,000 copies to date in its two previous editions and has found a niche with skygazers, is much awaited. Through extensive graphics integrated with an eight-year-long calendar of sky events, it provides a look at "don't miss" sky events, mostly for naked-eye and binocular observing. The book is organized by ease of observation - lunar phases and the brighter planets come first, while solar eclipses, the aurora, and comets come later. Celestial Delights also includes a hefty dose of sky lore, astronomical history, and clear overviews of current science. It provides a handy reference to upcoming naked-**

**The Invisible Hand in Popular Culture Jan 26 2023**

**“Analyzes how ideas about economics and political philosophy find their way into everything from Star Trek to Malcolm in the Middle.” —Wall Street Journal Popular culture often champions freedom as the fundamentally American way of life and celebrates the virtues of independence and self-reliance. But film and television have also explored the tension between freedom and other core values, such as order and political stability. What may look like healthy, productive, and creative freedom from one point of view may look like chaos, anarchy, and a source of destructive conflict from another. Film and television continually pose the question: Can Americans deal with their problems on their own, or must they rely on political elites to manage their lives? In this groundbreaking work, Paul A. Cantor—whose previous book, Gilligan Unbound, was**

named one of the best nonfiction books of the year by the Los Angeles Times—explores the ways in which television shows such as Star Trek, The X-Files, South Park, and Deadwood and films such as The Aviator and Mars Attacks! have portrayed both top-down and bottom-up models of order. Drawing on the works of John Locke, Adam Smith, Alexis de Tocqueville, and other proponents of freedom, Cantor contrasts the classical liberal vision of America—particularly its emphasis on the virtues of spontaneous order—with the Marxist understanding of the “culture industry” and the Hobbesian model of absolute state control. *The Invisible Hand in Popular Culture* concludes with a discussion of the impact of 9/11 on film and television, and the new anxieties emerging in contemporary alien-invasion narratives: the fear of a global technocracy that seeks to destroy the nuclear family, religious faith, local government, and other traditional bulwarks against the absolute state.

There are people who love Jack and will do

**Keep Watching the Skies! Apr 17 2022** Bill Warren's **Keep Watching the Skies!** was originally published in two volumes, in 1982 and 1986. It was then greatly expanded in what we called the 21st Century Edition, with new entries on several films and revisions and expansions of the commentary on every film. In addition to a detailed plot synopsis, full cast and credit listings, and an overview of the critical reception of each film, Warren delivers richly informative assessments of the films and a wealth of insights and anecdotes about their making. This book is also available in softcover format (ISBN 978-1-4766-6618-1).

**Fauna and Flora, Earth and Sky Jun 07 2021** "[Fauna and Flora, Earth and Sky] is, in fact, the most intelligent, thoughtful, original, challenging, and highly entertaining work of nature writing since Barry Lopez's *Arctic Dreams*. . . . It is her broad scope of contemplation, combined with her fiercely beautiful and detailed renderings of passion, natural and human, that give Trudy Dittmar's first but fully mature book its remarkable originality and considerable power." --Robert Finch, *Los Angeles Times Book Review*  
"Honest self-scrutiny is irresistible, especially when told with a knack for diction of place, as this author demonstrates on every page. She is both of the landscape and an informed observer of it, willing to examine her

conflicts between the experiences that play in her imagination and the scientific knowledge she's gleaned through training and reading." --The Bloomsbury Review

"Trudy Dittmar is an elegant stylist and an acute observer. She's read everything there is to read about the physics of rainbows, the habits of the porcupine, the winter survival skills of the moose and the orbits of the planets, but even her learning is outdistanced by her patient powers of looking, smelling, hearing, touching and tasting. Her originality arises out of this patience. And, magically, she is able to read into and out of the rich, endangered natural world an Emersonian understanding of self. This is at once the most objective and subjective book I have ever read." --Edmund White, author of *A Boy's Own Story*

"Dittmar writes about life with the precision of a scientist and the introspective lyricism of a poet, illuminating for us those parts of the world we barely remember to notice...from the complex emotional lives of cows and pronghorns to the dazzling leaves of a silver maple to the teeming hidden pools of bright salamanders. Reading this book is like finding a geode in a stream bed--crack it open and it sparkles--Jo Ann Beard

"Dittmar, who won a Rona Jaffe Foundation Writer' Award in 2000 and whose writings have appeared in numerous publications . . . provides a fascinating look at natural and personal history in these ten essays on animals, plants, and other natural phenomena. . . . An excellent choice for both public and academic libraries." --Library Journal

In essays with settings that range from the Wind River Mountains of Wyoming, to the mountain town of Leadville,

Colorado, to the Pine Barrens of New Jersey, Trudy Dittmar weaves personal experience with diverse threads of subject matter to create unexpected connections between human nature and nature at large. Life stories, elegantly combined with mindful observations of animals, plants, landscape and the skies, theories in natural science, environmental considerations, and touches of art criticism and popular culture, offer insights into the linked analogies of nature and soul. A glacial pond teeming with salamanders in arrested development is cause for reflection on the limits of a life that knows only bounty. The hot blue lights of celestial phenomena are a metaphor for fast, flashy men--he loves of a life--and a romantic career is interpreted. Watching a pronghorn buck battling for, and ultimately losing, his harem leads to a meditation on a kind of immortality. Fauna and Flora, Earth and Sky is testimony to the bearing and consequence of nature in one life, and to the richness of understanding it can bring to all human lives. Trudy Dittmar was born and raised in New Jersey farm country. In addition to holding an MA in English literature from the University of Chicago, she is a graduate of Columbia University's MFA program in writing and the founder and former director of a writing program at Brookdale Community College in New Jersey. Her work has appeared in such publications as The Norton Book of Nature Writing, Pushcart XXI, Georgia Review, and Orion. She divides her time between her family home in New Jersey and her cabin in Wyoming.

***Blue Skies* Aug 21 2022** Cable television is arguably the dominant mass media technology in the U.S. today. *Blue Skies* traces its history in detail, depicting the important events and people that shaped its development, from the precursors of cable TV in the 1920s and '30s to the first community antenna systems in the 1950s, and from the creation of the national satellite-distributed cable networks in the 1970s to the current incarnation of "infrastructure" that dominates our lives. Author Patrick Parsons also considers the ways that economics, public perception, public policy, entrepreneurial personalities, the social construction of the possibilities of cable, and simple chance all influenced the development of cable TV. Since the 1960s, one of the pervasive visions of "cable" has been of a ubiquitous, flexible, interactive communications system capable of providing news, information, entertainment, diverse local programming, and even social services. That set of utopian hopes became known as the "Blue Sky" vision of cable television, from which the book takes its title. Thoroughly documented and carefully researched, yet lively, occasionally humorous, and consistently insightful, *Blue Skies* is the genealogy of our media society.

**Exploring Teachers in Fiction and Film Feb 21 2020 This book about teachers as characters in popular media examines what can be learned from fictional teachers for the purposes of educating real teachers. Its aim is twofold: to examine the constructed figure of the teacher in film, television and text and to apply that examination in the context of teacher education. By exploring the teacher construct, readers are able to consider how popular fiction and film have influenced society's understandings and views of classroom teachers. Organized around four main themes—Identifying with the Teacher Image; Constructing the Teacher with Content; Imaging the Teacher as Savior; The Teacher Construct as Commentary—the chapters examine the complicated**

"Not The Only Sky is not only beautifully and poignantly written, but also provides fascinating insights into life in rural America. **Far Away in the Sky May 18 2022 Some were paid. Some felt compelled by a duty to God. Some volunteered. Some died doing it. All flew on rickety old aircraft into a nighttime, wartime patch of African forest called Biafra. Far Away in the Sky gives the personal account of one of them, a young American volunteer who joined the largest international humanitarian relief airlift ever attempted. In 1968 millions of people, mostly children, were starving due to a military blockade of Biafra, the former Eastern Region of Nigeria. The World Council of Churches and Caritas International mounted a relief airlift. Flying at night to avoid Nigerian Migs, without radar or any modern navigational aids, landing amid bombs on a stretch of road in the rain forest, the old planes delivered thousands of tons of food and medicines. UNICEF recruited six former United States Peace Corps Volunteers, including the author, to help unload the planes. The former volunteers had served in Nigeria and were familiar with the area and the people. To David Koren the people of Biafra, his former students and fellow teachers, constituted his motive for joining the airlift. More than just a memoir of events, Far Away in the Sky promotes a discussion of international aid, of the balance between the grace of giving and the dignity of receiving aid, and the policies of governments toward intervention or non-intervention in humanitarian disasters. How do the**
