Reciprocal Freedom elucidates the relationship between private law and the state, presenting reciprocal freedom as the normative idea underlying a legal order in which private law occupies a distinctive place. Weinrib develops a set of interconnected conceptions of private law, corrective justice, rights, ownership, the role of legal institutions, distributive justice, the relationship of constitutional rights to private law, and the rule of law. The book is explicitly Kantian in inspiration; it presents a non-instrumental account of law that is geared to the juridical character of the modern liberal state. Combining legal and philosophical analysis, it offers a sequenced and legally informed argument for understanding law as necessary to our co-existence as free beings. The Yearbook contains the official records of the International Law Commission and is an indispensable tool for the preservation of the legislative history of the documents emanating from the Commission, as well as for the teaching, study, dissemination and wider appreciation of the efforts undertaken by the Commission in the progressive development of international law and its codification. Volume II (Part Three) reproduces the edited version of the annual report of the Commission to the General Assembly. This article introduces a novel element to copyright law's exemptions' scheme, and particularly the fair use doctrine-a reciprocal share-alike requirement. I argue that beneficiaries of a

copyright exemption should comply with a complementary set of ex-post reciprocal share-alike obligations that come on top of the exemption that they benefit from. Among other aspects, reciprocal share-alike obligations may trump contractual limitations and technological protection measures that are imposed by parties who relied on a copyright exemption in the course of their own use of copyrighted materials. Thus, fair use beneficiaries should be obliged to treat alike subsequent third parties who wish to access and use copyrighted materials-now located in their new "hosting institution"-for additional legitimate uses. For example, if Google argues that its Book Project's scanning of entire copyrighted works are fair use, a similar exemption should apply to the benefit of future third parties who wish to use, for similar socially valuable purposes and under similar limitations, digital copies of books from Google's databases and applications. Google should also be prohibited from imposing technological protection measures and contractual obligations that revoke its reciprocal share-alike obligations. Similar quid-pro-quo schemes may apply in the context of content sharing platforms that initially rely on the Digital Millennium Copyright Act's (DMCA's) safe harbor for hosting services providers but later on impose proprietary restrictions on third parties who wish to reproduce and further use materials that were uploaded on the platform by end-users (e.g. as in the case of YouTube.com). And one could go on and apply this basic logic of a reciprocal share-alike quid-pro-quo on many other elements in copyright law's scheme of exemptions and limitations. I argue that the making of copyright's exemptions reciprocal corresponds well and improves the economics of copyright and public-welfare considerations. Overall, reciprocal share-alike exemptions structure copyright law in manner that strikes a better balance between copyright's contribution (incentive) to cultural production and copyright's social cost-the burdens it imposes on future creators. As long as a reciprocal share-alike requirement is structured in a scope that maintains enough incentives to produce secondary works, it represents a social benefit that copyright law should capture. In addition, the article argues that reciprocal share-alike exemptions further enhance democratic, autonomy and distributive values that underlie a public-oriented vision of copyright law.

1. Pathfinder NDA/NA Entrance Examination - prescribed under UPSC Guidelines.
2. The Self Study Guide divides the entire syllabus in 4 Major Sections
3. Provides 5 Previous Years' Solved Papers for practice
4. More than 8000 MCQs for quick revision of topics

Originally published in 1920, this book consists of a series of illustrative experiments by the chemist and educationalist Ida Freund. Reciprocal Freedom elucidates the relationship between private law and the state, presenting reciprocal freedom as the normative idea underlying a legal order in which private law occupies a distinctive place. Weinrib develops a set of interconnected conceptions of private law, corrective justice, rights, ownership, the role of legal institutions, distributive justice, the relationship of constitutional rights to private law, and the rule of law. The book is explicitly Kantian in inspiration; it presents a non-instrumental account of law that is geared to the juridical character of the modern liberal state. Combining legal and philosophical analysis, it offers a sequenced and legally informed argument for understanding law as necessary to our co-existence as free beings. In many African countries, litigants experience significant uncertainty in their attempts to enforce foreign judgments. Drawing on the experiences of the United Kingdom and the United States (vis-à-vis efforts to attain an effective global legal framework on foreign judgments), this book undertakes a comparative analysis of how South African and Nigerian courts can promote the recognition and enforcement of foreign judgments in a fair manner. This comparative analysis is made considering both African countries as paradigms of their respective legal traditions. The author, a legal consultant and academic in private international law analyses, stage by stage, the challenging process that litigants face when they seek to enforce foreign judgments in South Africa and Nigeria. This analysis includes insightful consideration of broader issues such as the following: how challenges faced by judgment creditors may be circumvented; practical issues impeding the free movement of foreign judgments; impact of globalisation, increase in international commercial transactions, and regionalism on private international law; application of 'fairness'; how territorial sovereignty and State interests in international commerce impede the free movement of foreign judgments; and 'qualified obligation', under which courts would presumptively enforce foreign judgments subject to certain exceptions and to the balancing of competing interests between private litigants and the State. The comparative analysis is undergirded by relevant case law – spanning decades in Africa and centuries in Europe and the United States. In summary, the author projects a clear case for predictability and certainty in the recognition and enforcement of foreign judgments, as well as how to go about it, thus offering lawyers a strategic position to weigh their options in contemplating enforcement of foreign judgments in any jurisdiction even beyond the African region. This innovative approach will also be of particular value to policymakers at national levels, international and regional economic organisations, as well as scholars in private international law and international commercial law generally. This is regardless of their specific legal area or niche, especially considering the dearth of literature in African private international law. An international journal of general philosophy. "Unjustified enrichment" is one of the three main non-contractual obligations dealt with in the DCFR. In recent years unjustified enrichment has been one of the most intellectually animated areas of private law. In an area of law whose territory is still partially uncharted and whose boundaries are contested, this volume of Principles of European Law will be invaluable for academic analysis of the law and its development by the courts. During the drafting process, comparative material from over 25 different EU jurisdictions has been taken into account. The work therefore is not only a presentation of a future model for European rules to come but provides also a fairly detailed indication of the present legal situation in the Member States. In international relations, reciprocity describes an environment in which States support one another for short- or long-term advantage through the balancing of rights, duties and interests. This book examines reciprocity in the context of international law. It considers the role reciprocity plays in the creation and development of international law as well as in the interpretation and application of international law. The book illuminates the reciprocal framework of international law and international relations by examining the role reciprocity plays in different types of States' obligations, including bilateral, bilateralisable multilateral, non-bilateralisable multilateral and obligations erga omnes. The book examines how reciprocity is intertwined with the principle of equality, as the rights and obligations of States are equal irrespective of size and economic or military strength, and the beneficial effects of reciprocity in creating stability and cooperation amongst States. The responsibility for the future lies with the individual human being, to whom is given the free will to change for the good and to become noble from within. This book has the ability to guide us to a deeper understanding of the purpose of human existence, indicating to us our role in the machinery of the Universe. The book explains the seven most important Laws of Creation, which lead to the liberation of the spirit and speaks to the readers' heart, awakening an awareness and responsibility towards the world around them. The Law of Attraction of Homogeneous Species, the Law of Gravity and the Law of Reciprocal Action play key roles in all areas of our lives. We always reap what we sow - and we must understand that we do not only sow with words and deeds but also with our thoughts and our intuitive perceptions. Essential steps and relevant ideas for a future worth living are shown and the foundation for a successful life based on the Spiritual Laws is explained. Stefan Heinrich Ehbrecht searched his whole life for spiritual knowledge and true values. He spends a lot of time in nature and has planted several wildlife habitats including a meadow orchard and a walnut grove. As Diplom-Ingenieur and Diplom-Wirtschaftsingenieur he has studied electrical engineering, business administration, economics and history and has lived and worked in various countries in North and Central America and Europe. The author has served for twelve years in the Air Force as Tactical Control Officer and Technical Officer.
