NEW! REA's ATI TEAS Crash Course® Perfect for nursing and allied health program applicants In August 2016, the ATI TEAS exam replaced the TEAS V. The ATI TEAS, already the most widely-used nursing school admission exam in the U.S., is now also used for allied health program admission nationwide. REA's ATI TEAS Crash Course® is aligned with the most recent exam changes to the TEAS, or Test of Essential Academic Skills. Our ATI TEAS Crash Course® features easy-to-read review chapters that cover every exam objective in reading, mathematics, science, and English and language usage. A full-length online practice exam comes with automatic scoring and detailed explanations of answers. Helpful diagnostics pinpoint where test candidates are strongest and where they need to focus their study. The new ATI TEAS allows for one unified test to cover BSN, ADN, PN, and Allied Health programs. The ATI TEAS test blueprint has been revised to align with evolving developments in the nursing field and the curriculum, creating different points of emphasis on the test. In addition, the number of questions allotted to each content area has been changed, and examinees now may use an on-screen calculator. About REA's Prep: - A complete ATI TEAS course in a concise, time-saving format - Targeted review covers only the material that will actually be tested - Strategies for answering every type of question - Online practice exam pinpoints your strengths and weaknesses

MAKE THE BREATH CONNECTION -- AND SAVE YOUR OWN LIFE Are you one of the hundreds of thousands of Americans who suffer from asthma, emphysema, bronchitis, or other respiratory ailments? Far too often, people with these illnesses are prescribed medications that only mask symptoms, instead of really treating the underlying condition. If you are among this group, it's time for you to escape this prison and start Breathing Free. Teresa Hale, founder of the world-renowned Hale Clinic, has created a groundbreaking treatment that can dramatically change the lives of anyone who feels the crippling affect these illnesses can have on their daily lives, in as little as five days. Called the Breath Connection, this revolutionary program is based on more than forty-five years of empirical research, as well as the Buteyko method, which focuses on dysfunctional breathing, or overbreathing, as the cause of more than 200 respiratory diseases. Breathing Free is complete with line drawings and clear instructions on how to use these simple methods to reestablish normal breathing patterns to prevent and overcome attacks, restore healthy and restful sleep, and reduce the need for medication by up to 60 percent. For the many people who have lived with the struggle of breathing problems, Breathing Free provides hope for relief, better health, and a better life. Using step-by-step photographs, *Providing Respiratory Care* gives you authoritative, easy-to-use information on performing respiratory assessment, monitoring, and treatment. Over 350 photographs show you how to assess the thorax and lungs, perform pulse oximetry and monitor [actual symbol not reproducible] levels, care for ventilator patients, and care for endotracheal and tracheostomy tubes. Crystal-clear photographs show hands-on care performed by experienced nurses. You'll find easy-to-follow directions for basic and complex procedures. You'll also find close-up views of respiratory equipment, including the latest ventilators. This report considers the biological and behavioral mechanisms that may underlie the pathogenicity of tobacco smoke. Many Surgeon General's reports have considered research findings on mechanisms in assessing the biological plausibility of associations observed in epidemiologic studies. Mechanisms of disease are important because they may provide plausibility, which is one of the guideline criteria for assessing evidence on causation. This report specifically reviews the evidence on the potential mechanisms by which smoking causes diseases and considers whether a mechanism is likely to be operative in the production of human disease by tobacco smoke. This evidence is relevant to understanding how smoking causes disease, to identifying those who may be particularly susceptible, and to assessing the potential risks of tobacco products. The AJN Book of the Year award-winning textbook, *Psychiatric Nursing: Contemporary Practice*, is now in its thoroughly revised, updated Fourth Edition. Based on the biopsychosocial model of psychiatric nursing, this text provides thorough coverage of mental health promotion, assessment, and interventions in adults, families, children, adolescents, and older adults. Features include psychoeducation checklists, therapeutic dialogues, NCLEX® notes, vignettes of famous people with mental disorders, and illustrations showing the interrelationship of the biologic, psychologic, and social domains of mental health and illness. This edition reintroduces the important chapter on sleep disorders and includes a new chapter on forensic psychiatry. A bound-in CD-ROM and companion Website offer numerous student and instructor resources, including Clinical Simulations and questions about movies involving mental disorders. This review module is a component of the Comprehensive Assessment and Review Program and is designed to be used in conjunction with content area exams. It includes key points and critical thinking exercises (with answer keys) for nursing management for a variety of conditions. A revision of the popular Mosby's Rapid Review Series, this book provides essential, need-to-know material for both course study and NCLEX-RN® test preparation. This series helps students prepare for both course tests and board exams by including review questions and answers at the conclusion of every chapter and a comprehensive exam at the end of every book in the series, all in the standard NCLEX format. A free CD-ROM with 150 NCLEX format questions is packaged with each title in the series. A Volume in the Rollant Nursing Review Series (Includes FREE CD-ROM) *Avery's Diseases of the Newborn*, edited by Christine A. Gleason and Sherin U. Devaskar, is a practical, clinical reference for diagnosing and managing of all the important diseases affecting newborns. Thoroughly revised by a team of new editors, this edition provides new perspectives and updated coverage of genetics, nutrition, respiratory conditions, MRSA, neonatal pain, cardiovascular fetal interventions, care of the late preterm infant, and more. This authoritative reference is ideal as a clinical resource or subspecialty review tool. Treat newborns effectively with focused coverage of diagnosis and management, including pertinent developmental physiology and the pathogenesis of neonatal problems. Meet every challenge you face in neonatology with Avery's authoritative, comprehensive clinical resource and subspecialty review tool. Navigate quickly and easily with extensive cross-referencing throughout the organ-related sections. Stay current with coverage of hot topics including MRSA, neonatal pain, cardiovascular fetal interventions, care of the late preterm infant, and the developing intestinal microbiome. Tap into the fresh perspectives of new editors who provide extensive updates throughout, particularly on genetic and respiratory disorders. Apply the latest nutritional findings with thorough discussions of this valuable information in the more comprehensive nutrition section. Master the fundamentals of neonatology through the greater emphasis on developmental biology and pathobiology. Covering the full range of nursing interventions, *Nursing Interventions Classification (NIC)*, 6th Edition provides a research-based clinical tool to help in selecting appropriate interventions. It standardizes and defines the knowledge base for nursing practice while effectively communicating the nature of nursing. More than 550 nursing interventions are provided - including 23 NEW labels. As the only comprehensive taxonomy of nursing-sensitive interventions available, this book is ideal for practicing nurses, nursing

students, nursing administrators, and faculty seeking to enhance nursing curricula and improve nursing care. More than 550 research-based nursing intervention labels with nearly 13,000 specific activities Definition, list of activities, publication facts line, and background readings provided for each intervention. NIC Interventions Linked to 2012-2014 NANDA-I Diagnoses promotes clinical decision-making. New! Two-color design provides easy readability. 554 research-based nursing intervention labels with nearly 13,000 specific activities. NEW! 23 additional interventions include: Central Venous Access Device Management, Commendation, Healing Touch, Dementia Management: Wandering, Life Skills Enhancement, Diet Staging: Weight Loss Surgery, Stem Cell Infusion and many more. NEW! 133 revised interventions are provided for 49 specialties, including five new specialty core interventions. NEW! Updated list of estimated time and educational level has been expanded to cover every intervention included in the text. Includes Abstracts section, previously issued separately. Includes Abstracts section. A classic resource that has helped nurses pass the NCLEX exam for over 60 years, Mosby's Comprehensive Review of Nursing for the NCLEX-RN® Examination, 20th Edition is fully updated to reflect the newest NCLEX-RN test plan. Content review is presented in a concise and full-color outline format organized by the core areas of medical-surgical, pediatric, maternity/women's health, and mental health nursing, with a practice test following each unit. More than 4,200 practice questions and rationales -- including more than 600 questions in the newest alternate item formats -- are written by a team of trusted NCLEX experts led by author Patricia M. Nugent. This title includes additional digital media when purchased in print format. For this digital book edition, media content may not be included. Prioritization, Delegation, and Assignment: Practice Exercises for the NCLEX(R) Examination is the only review book on the market with a focus on prioritization and management of care—just like the current NCLEX Examination itself! The workbook's unique approach establishes your foundational knowledge and then provides exercises of increasing difficulty to help you build confidence in your prioritization, delegation, and patient assignment skills. It offers unique preparation for the NCLEX Examination and effectively equips you to practice in today's fast-paced healthcare environment. The only workbook available that provides in-depth practice with prioritization, delegation, and assignment questions similar to those you'll see on the NCLEX Examination, including questions in alternate item formats Unique three-part organization that (1) equips you with foundational skills to make sound decisions, then helps you apply those skills (2) in straightforward scenarios and (3) then in complex health scenarios In-depth Answer Key at the back of the book that provides not only the correct answer but also a detailed rationale and an indication of the focus of the question, whether prioritization, delegation, supervision, or patient assignment. Expanded content focus to include psychiatric/mental health, OB/maternity, and pediatrics along with med-surg areas New chapters on infection control and obstetrics and maternity Greater emphasis on questions involving core body systems and related health problems, such as diabetes and cancer, to best prepare you for the conditions you are most likely to encounter on the NCLEX Examination and in clinical practice Four new unfolding cases addressing long-term care, pediatrics, psychiatric/mental health nursing, and OB/maternity Additional emphasis on medication safety equips you to take appropriate actions to prevent or remediate medication errors Multiple-select questions revised to include at least 5 response choices each, keeping you up to date with the full range of NCLEX Examination item formats Includes Abstracts section, previously issued separately. The NCLEX-PN exam is not just about what you know—it's about how you think. Kaplan's NCLEX-PN Prep Plus uses expert critical thinking strategies and targeted sample questions to help you put your expertise into practice, apply the knowledge you've gained in real-life situations, and face the exam with confidence. In NCLEX-PN Prep Plus, Kaplan's all-star nursing faculty teaches you essential strategies and critical-thinking techniques you need to apply your knowledge. Proven Strategies. Realistic Practice. 9 critical thinking pathways to break down what exam questions are asking 6 end-of-chapter practice sets to help you put critical thinking principles into action 2 full-length practice tests to gauge your progress—one in the book, one online Detailed rationales for all answer choices, correct and incorrect Techniques for mastering the computer adaptive test format Expert Guidance In-depth content review, organized along the exam's "Client Needs" framework 60 minutes of video tutorials on the ins and outs of the NCLEX-PN Kaplan's learning engineers and expert psychometricians ensure our practice questions and study materials are true to the test We invented test prep—Kaplan (www.kaptest.com) has been helping students for 80 years, and our proven strategies have helped legions of students achieve their dreams With NCLEX-PN Prep Plus you can study on-the-go. Log in from anywhere to watch video tutorials, review strategies, and take your online practice test. A guide to the techniques and analysis of clinical data. Each of the seventeen sections begins with a drawing and biographical sketch of a seminal contributor to the discipline. After an introduction and historical survey of clinical methods, the next fifteen sections are organized by body system. Each contains clinical data items from the history, physical examination, and laboratory investigations that are generally included in a comprehensive patient evaluation. Annotation copyrighted by Book News, Inc., Portland, OR Kaplan's ATI TEAS Prep Plus provides comprehensive content review, realistic practice, and expert advice to help you face the test with confidence and get into the school of your choice. Kaplan's content review and practice questions are developed and tailored to the TEAS 6 for the most up-to-date prep. Our exam-focused instruction and targeted practice help you make the most of your study time. The Best Review Two full-length practice tests with comprehensive explanations of every question 50-question online Qbank for additional test-like practice More than 300 additional practice questions and explanations to develop your skills Expert review of all TEAS content areas: Reading, Math, Science, and English and Language Usage Glossaries to help you understand the key terms in each content area Expert Guidance Our practical test-taking strategies and study techniques help prepare you for even the hardest concepts Kaplan's expert nursing faculty reviews and updates content annually. We invented test prep—Kaplan (www.kaptest.com) has been helping students for 80 years. Our proven strategies have helped legions of students achieve their dreams. Geared to LPNs/LVNs, this quick-reference pocket book provides an easy-to-understand guide to ECG interpretation and features over 200 clearly explained ECG rhythm strips. Following a refresher on relevant cardiac anatomy, physiology, and electrophysiology, the book presents the 8-step method for reading any rhythm strip. Subsequent chapters explain various cardiac rate and rhythm abnormalities, including sinus node arrhythmias, atrial arrhythmias, junctional arrhythmias, ventricular arrhythmias, and atrioventricular blocks. Arrhythmias are covered in a consistent format—causes, significance, ECG characteristics, signs and symptoms, and interventions. Coverage also includes ECG characteristics of disorders, drugs, pacemakers, and implantable cardioverter-defibrillators and a chapter on basic 12-lead electrocardiography. This book presents WHO guidelines for the protection of public health from risks due to a number of chemicals commonly present in indoor air. The substances considered in this review, i.e. benzene, carbon monoxide, formaldehyde, naphthalene, nitrogen dioxide, polycyclic aromatic hydrocarbons (especially benzo[a]pyrene), radon, trichloroethylene and tetrachloroethylene, have indoor sources, are known in respect of their hazardousness to health and are often found indoors in concentrations of health concern. The guidelines are targeted at public health professionals involved in preventing health risks of environmental exposures, as well as specialists and authorities involved in the design and use of buildings, indoor materials and products. They provide a scientific basis for legally enforceable standards. The perfect companion to Introductory Medical-Surgical Nursing, 10th Edition, this handy workbook helps students review and apply essential content from the textbook. With this resource, students will prepare for the challenges of today's exams and tomorrow's practice—from the hospital or clinic to the home or long-term care facility! The review students need to excel on their medical physiology course exams and the USMLE This powerful new review follows the format of the acclaimed Katzung & Trevor's Pharmacology Examination & Board Review. It delivers a concise overview of essential high-yield topics and fundamental concepts, followed by USMLE-style Q&A. The chapter-based approach facilitates use with course notes or larger texts. Presented in full color, the book includes numerous flow charts, illustrations, and tables that summarize must-know information. Ganong's Medical Physiology Examination & Board Review succinctly covers all key physiology principles and includes clinical correlations to clarify the connection between physiology and clinical medicine. The book includes two comprehensive 100-question examinations, followed by the correct answer and rationales. Learning aids included bolded key terms, skill-builder questions that prompt readers to review previous material, and end-of-chapter checklists. · Essential for USMLE Step 1 review · An excellent course book for physiology · Companion website offers interactive customizable qBank For courses in Pediatric Nursing. A comprehensive survey of family-centered pediatric nursing care Child Health Nursing: Partnering with Children & Families promotes excellence in nursing care for infants, children, and adolescents—in hospitals and in the community. It focuses on the importance of partnering with families to adapt care plans for children based on their age, health status, and social and cultural influences. The text considers the impact of contemporary care environments on nursing practice, both in health promotion and in the care of children with acute or chronic health

conditions. By offering industry best practices and practical applications, the book encourages students to apply evidence-based findings and clinical reasoning to planning superior care. The updated 3rd edition explains how modern nursing practice is affected by reforms to healthcare and its delivery—such as electronic health records, new approaches to chronic and acute condition management, and a focus on prevention. To support safe, effective, and innovative care, this edition draws on the latest recommendations of NANDA International diagnoses, Nursing Intervention Classifications (NIC), Nursing Outcomes Classifications (NOC), and Healthy People 2020. Also available with MyLab Nursing MyLab(tm) Nursing is an online self-study and class preparation program designed to engage students and improve results. Its personalized learning path helps students think like nurses as they move beyond memorization to true understanding through application. Learn more. Note: You are purchasing a standalone product; MyLab Nursing does not come packaged with this content. Students, if interested in purchasing this title with MyLab Nursing, ask your instructor to confirm the correct package ISBN and Course ID. Instructors, contact your Pearson representative for more information. If you would like to purchase both the physical text and MyLab Nursing search for: 0134874439 / 9780134874432 Child Health Nursing Plus MyNursingLab with Pearson eText -- Access Card Package Package consists of: 0134624726 / 9780134624723 Child Health Nursing 013486946X / 9780134869469 MyNursingLab with Pearson etext -- Access Code -- for Child Health Nursing An easy-to-read text focusing on all areas of nursing to aid in successful preparation for the NCLEX-RN. A unique feature of this book is the test-taking strategies included in each chapter. Additionally, students will find content review, practice tests at the end of each chapter with answers and rationales for right and wrong answers and a free CD-ROM that includes the 2,700 practice questions from the text plus 600 additional practice questions. "Nurses play a vital role in improving the safety and quality of patient care -- not only in the hospital or ambulatory treatment facility, but also of community-based care and the care performed by family members. Nurses need know what proven techniques and interventions they can use to enhance patient outcomes. To address this need, the Agency for Healthcare Research and Quality (AHRQ), with additional funding from the Robert Wood Johnson Foundation, has prepared this comprehensive, 1,400-page, handbook for nurses on patient safety and quality -- Patient Safety and Quality: An Evidence-Based Handbook for Nurses. (AHRQ Publication No. 08-0043)." - online AHRQ blurb, <http://www.ahrq.gov/qual/nursesfdbk/> The overall goal of this Assessment Technologies Institute, LLC (ATI) Content Mastery Series module is to provide nursing students with an additional resource for the focused review of "Fundamentals for nursing" content relevant to NCLEX preparation and entry level nursing practice. Kaplan's ATI TEAS Strategies, Practice & Review provides comprehensive content review, realistic practice, and expert advice to help you face the test with confidence and get into the school of your choice. Kaplan's content review and practice questions are developed and tailored to the TEAS 6 for the most up-to-date prep. Our exam-focused instruction and targeted practice help you make the most of your study time. The Best Review Two full-length practice tests with comprehensive explanations of every question 50-question online Qbank for additional test-like practice More than 300 additional practice questions and explanations to develop your skills Expert review of all TEAS content areas: Reading, Math, Science, and English and Language Usage Glossaries to help you understand the key terms in each content area Expert Guidance Our practical test-taking strategies and study techniques help prepare you for even the hardest concepts Kaplan's expert nursing faculty reviews and updates content annually. We invented test prep—Kaplan (www.kaptest.com) has been helping students for almost 80 years. Our proven strategies have helped legions of students achieve their dreams. Equip students with the necessary clinical judgment for effective nursing health assessment with Nursing Health Assessment: A Clinical Judgment Approach, 4th Edition. This extensively revised and updated text combines fundamental knowledge and a progressive, student-friendly presentation with an emphasis on critical thinking and clinical decision-making to help students excel on the Next Generation NCLEX® and confidently transition to nursing practice. Paediatric Neurosurgery for Nurses: Evidence-based care for children and their families provides accessible and up-to-date information for nurses working in paediatric neurosurgery. Referring throughout to the evidence-base for care and interventions, this complex area is described and explained in a meaningful and easily understandable way. The text includes chapters on the underpinning knowledge and principles for the care of children who need neurosurgery as well as the following common neurological problems: Hydrocephalus Traumatic Brain Injury Craniostomosis Brain Tumours Surgical management of epilepsy in children Cerebrovascular disorders Neural tube defects The complexity of the nervous system and principles of care are presented logically with points to consider and essential care clearly highlighted and, where available, evidence-based practice is presented. It includes a range of pedagogical features, such as chapter overviews and summaries, diagrams, sample care plans, text boxes and a glossary. This book is essential reading for pre-registration nursing students and newly qualified nurses but will also be of use to allied healthcare professionals working with children and young people requiring neurosurgery. Assisted Ventilation of the Neonate, 5th Edition, by Drs. Jay P. Goldsmith and Edward Karotkin, guides you through the latest innovations in ventilatory assistance, helping you improve outcomes and quality of life in newborns. With a new emphasis on non-invasive ventilation and earlier extubation, it covers basic concepts of pulmonary pathophysiology and offers practical guidance on both basic and advanced ventilation management strategies. Access expert coverage of all aspects of neonatal pulmonary care—including complications, nutrition, transport, outcomes, follow-up, and parental education. Sharpen your diagnostic and clinical skills with case studies drawn from actual patients. Find key facts fast with more than 30 quick-reference appendices: normal values, assessment charts, ICU flow charts, procedure steps, and other useful tools. Learn how to best use assisted ventilation equipment and pharmacologic agents to prevent long-term pulmonary and neurologic damage. Benefit from Drs. Goldsmith and Karotkin's widely acknowledged expertise in neonatology and pulmonology. Incorporate the latest innovations in ventilatory strategies in your practice. Gain new insight into today's hottest topics including Ventilator Associated Pneumonia; Quality Improvement; Ventilation of Neonates in Developing Countries; and Human Interactions with Mechanical Ventilators. Understand the pros and cons of non-invasive ventilation and earlier extubation. Avoid ventilator-associated illness and injury with practical guidance in this vital area. Get coverage of basic concepts and advanced neonatal ventilation management strategies in one volume. Master the art of mechanical ventilation with the latest innovations in ventilatory assistance and improve outcomes and quality of life in newborns. This is the only guide you need to pass the MRCS Part B OSCE examination. This unique two-volume set includes comprehensive revision notes on all the areas covered in the exam; numerous practice scenarios with model answers in the format they would be encountered in the exam; and essential exam technique tips. Written by a team of editors and authors with extensive experience of the exam and all the recent changes, it broaches topics that can often trip up the candidate, including communication and history-taking skills. Revision is aided by over 130 images and illustrations, as well as boxes highlighting clinical tips and exam hints. Volume 2 addresses the stations that exam the four specialty areas: Trunk and Torso; Limbs and Spine; Head and Neck, and Neuroscience. It covers the anatomy, physiology and pathology in each of these four speciality areas along with detailed clinical exam scenarios and a bank of likely clinical questions and model answers.
