Its take-no prisoners style holds nothing back, and eliminates any guess-work related to which techniques work and which ones are outdated. The best way to shoot is using the Isosceles Stance, fact or myth? What about the press-out technique? According to Professor Roger H. Lincoln, there are two rules for success in life: 1. Never tell everything you know. 2. Never tell everything all at once. In this book, Ben Stoeger laughs in the face of this great entrepreneur. Top shooters share a common knowledge which they have collected over the years from a plethora of sources; a knowledge that, in its whole, is far from common to the average shooter in that it is scattered. In this book, the top

shooters such as Bob Vogel, Dave Sevigny, and Matt Mink collaborate with the author, Ben Stoeger, to compile the so-called "Grand Master secrets" into one location. The knowledge spans from marksmanship fundamentals to shooting on the move, and competition skills such as stage breakdown and managing match pressure. Finally, this book contains many little tips, drills, and exercises to help you improve your shooting. In this book, "Top Shot" Season 3 Winner, Dustin Ellermann, will demonstrate training methods that have the power to have a bigger impact on your tactical shooting level than any book you have ever read. Why? Because they will help you get around the biggest obstacles to locking in and maintaining tactical firearms skills...time and money. These tactics, techniques, and procedures are the very same ones that elite special operations units from around the globe, many with unlimited ammo budgets, use to train beginning and advanced tactics as well as maintain their edge. Who else uses these tactics? Olympic athletes of all disciplines and competitive shooters, including the champion of Top Shot Season 3, Dustin Ellermann, who you see on the cover and who graciously agreed to demonstrate the skills throughout. Every tactic, technique, and procedure has been designed so that you can learn and refine your tactical firearms skills in the comfort of your own home without wasting precious money on ammo and range time, or wasting time driving to and from the range and cleaning your firearms. Perhaps most importantly, this book will show you how to practice advanced tactical and self-defense skills with a firearm, even if you live (or anticipate living) somewhere that is hostile towards gun owners. Finally, if you've got any new shooters who you want to introduce to shooting, you'll learn how to give them an advanced comfort at arms before they ever fire their first shot. You'll be able to imprint solid fundamentals and muscle memory BEFORE they have a chance to develop any undesirable habits. Just some of the topics he covers are the primary requirements for the ideal service pistol according to combat vets; the rule of thumb for choosing a serious combat caliber; the 4 most important fundamentals of combat marksmanship; secrets to shooting in extremely low light situations when even tritium sights are of no use; the solutions to emergency failure-to-stop situations; and practical drills you can perform safely at home. Recognize the void in your tactical training Train like you fight Maintain safety at all times Choose targets that force accountability Develop a series of standards Patrick McNamara spent twenty-two years

in the United States Army in a myriad of special operations units. When he worked in the premier special missions unit, he became an impeccable marksman, shooting with accurate, lethal results and tactical effectiveness. McNamara has trained tactical applications of shooting to people of all levels of marksmanship, from varsity level soldiers, U.S. Secret Service agents and police officers who work the streets to civilians with little to no time behind the trigger. His military experience quickly taught him that there is more to tactical marksmanship than merely squeezing the trigger. Utilizing his years of experience, McNamara developed a training methodology that is safe, effective and combat relevant and encourages a continuous thought process. This methodology teaches how to maintain safety at all times and choose targets that force accountability, as well as provides courses covering several categories, including individual, collective, on line and standards. TAPS: Tactical Application of Practical Shooting: Recognize the void in your tactical training will increase the confidence and efficiency in your shooting by providing training tips and courses of fire to help you significantly improve your marksmanship. Utilize his tips and techniques and reap the benefits as you shoot. Having shaped our nation since its birth, guns are an integral part of American life. Vera Koo enrolled in a firearm safety course because she was afraid of guns. Goals are important to Vera, so she set hers high, completing the beginner's course, and eventually becoming the best shooter in her advanced class. Her instructor suggested she reach for an even higher goal with competitive shooting. And she did. With unflinching focus and determination, Vera became one of the most accomplished shooters ever. At age 70, she's an eight-time women's division winner of the prestigious Bianchi Cup Action Pistol Championship. She's the first woman to place in the Top 20 in the Bianchi Cup competition. Vera's story is more than that of a petite Asian woman becoming a top competitor in the male-dominated sport shooting world. It's the story of a Chinese immigrant, raised in a traditional Chinese culture, where women deferred to their husbands and kept to their socio-economic class, succeeded in America. Vera is a successful businesswoman, accomplished athlete, and a loving wife and mother. It was never an 'either or' for Vera, it's about meeting life's challenges head-on with dogged persistence, grace, humility—and humor. With faith in herself and God, Vera has survived unexpected tragedies, tremendous hurt, and betrayal. And yet, her story is about hope, love, compassion, and forgiveness. Through all the twists and turns in her life, Vera shows us how the same grit that made her a world class athlete, helped her find joy. "Search for something you're good at," Vera says, "and it will take you far." - Vera

Some Comments from Lens Students I want you to know that in my many years of being a student, you easily rank as the best teacher I have ever had. Your skill and patience has made me infinitely more comfortable with my weapons and myself. The next class you teach, I'll be there in a heartbeat. I'm sure you don't have to be reminded of the multitude of people you have touched and the positive impact you have had on firearms training overall. Bob Patridge Len has taught me to effectively and safely use a handgun and rifle and for that I will always be grateful. I look forward to the time I spend once or twice a week under his instruction. Len has created a wide range of firearms training programs out of virtually nothing and trained a sizeable and competent cadre of firearms instructors who, like me, greatly respects the man. He is engaged with his students and always approachable. Students who have shot much longer than me comment on his great depth of knowledge and ability to improve their shooting. He clearly loves to teach the material and his enthusiasm is contagious. He has a great sense of humor and makes his classes a lot of fun. But in spite of all of this the safety of his students is always his first concern. Dr. Noel Pillman, MD I am a retired police officer and a former police firearms instructor for over 20 years. I have been to numerous firearms training classes over the years but have not had any instructors more professional, knowledgeable, and dedicated to what they do than Len Breure. Maurice Merabella "Len

was my first real 'tactical' instructor a few years ago. He is a thorough, safe, and well versed instructor. His teaching style is unique in a way that clearly conveys lessons and makes them easy to understand for experienced shooters and novices alike. Len brings a wealth of prior "been there, done that" experience to the table that's an asset to his teaching, and is rarely found in many of the new instructors that have come to the arena since most states have enacted concealed carry laws. I continue to train with a variety of tactical instructors, and am always amazed by how much of the information Len taught me is still the foundation upon which I build." Mike VanMeeteren "I have been fortunate enough to receive numerous training courses that were being taught by Len Breure. In my opinion, Len is one of the best in the business! It is very rewarding to be able to learn from someone who has the experience and knowledge to take tactical training to the next level." Jim Bryant I first meet Len while taking my Minnesota Concealed Carry Course in 2005. Since that time I have taken every course that Len teaches. In my opinion Len is the consummate professional, who teaches with passion and an incredible degree of knowledge. I would strongly urge anyone interested in personal protection to take Len's courses. Mike Pingel Since more than 26 states have passed laws requiring training for concealed carrying of firearms, citizens and police have a duty to teach the safe and responsible use of the weapons. In eight other states that permit concealed carry with no training required, men and women have a moral obligation to learn how to carry and use their firearms safely and responsibly. This handy little book contains everything a novice gun owner needs to know to start learning the basics of competent and safe pistol use, as well as the essentials of using a gun in a potentially violent confrontation with a criminal. It is an ideal textbook for state courses required for concealed carry permits. While there are many excellent books on handguns, marksmanship and self defense, all are designed for those who want to be expert in those subjects. There are no other books which address the specific concerns of someone who simply wants to carry a concealed firearm safely and responsibly until now. Bill Clede serves on the Connecticut State Police Firearms Advisory Committee which determines what training in his state will and will not include. A fruitless search for a suitable text is what prompted him to develop this book. One of Clede's primary goals is teaching how to avoid discharging the firearm in the first place, defusing aggressive behavior without resorting to shooting someone. The Practical Pistol Manual brings all these concerns together -- safety, competent shooting, and how to deal with violent behavior -- in one concise and affordable book. This is the only book that fills the need of a text for novices that covers safety, competent shooting, and how to deal with potentially violent encounters. Shooting to Live describes methods developed and practiced during an eventful quarter of a century and adopted by numerous police organizations in the Far East and elsewhere. It covers everything from the purpose of the pistol, to selection, training, advanced methods and more! This book was the first time that fighting with firearms was clearly and explicitly disassociated from classical target/range shooting. The proven techniques displayed have spawned most modern pistol techniques because of their simplicity and effectiveness. It is written as instruction to police forces in the methods of shooting (reflexive/instinctive) and training (realistic/challenging) that the author developed over two decades of active service in Shanghai. Another excellent performance training product from Shooting-Performance (www.shooting-performance.com), this book will give you a complete and functional training program designed to introduce and dramatically increase skills needed to perform your best in practical handgun competitions. No matter where you are in your skill level, this book will take you higher. Dozens of competitive shooters have used this program to win their class, division, or regional titles! It is a comprehensive program that contains: * Planning/Goal Setting Concepts * A Full Mental Training Routine * Physical Fitness Guidelines * Firearm Training Drills (including a full week by week training program) * A Vision

A surprising journey from tech support to professional marksman in front of the cameras. Chris Cheng won the title of "Top Shot," a \$100,000 cash prize, and a professional marksman contract with the show sponsor, Bass Pro Shops. How did a tech support guy who didn't shoot a lot of guns beat out seventeen other competitors—including seasoned military veterans, law enforcement officers, and pro marksmen—in History Channel's Top Shot season 4? An excellent guide for beginning shooters, Cheng focuses on the basics and ammunition of pistols, rifles, and shotguns, marksmanship fundamentals, and buying a firearm. "Automatic Pistol Shooting" by Walter Winans. Published by Good Press. Good Press publishes a wide range of titles that encompasses every genre. From well-known classics & literary fiction and non-fiction to forgotten or yet undiscovered gems of world literature, we issue the books that need to be read. Each Good Press edition has been meticulously edited and formatted to boost readability for all e-readers and devices. Our goal is to produce eBooks that are user-friendly and accessible to everyone in a high-quality digital format. Acquiring the ability to accurately shoot a pistol is no simple matter. One should not assume that the art of advanced pistol marksmanship is fully realized immediately upon reading a training manual on the fundamentals and techniques of pistol shooting; nor completely understood after having received a few hours of advice and instruction from a qualified coach or expert shooter. To become a top pistol shooter and able to produce consistently high scores, one must learn to perform all the fundamentals of shooting, acquire certain definite habits, achieve flawless coordination - and above all - have a capacity for the intense concentration essential to exercising a high degree of mental control. For this, one must train. It is difficult, if not impossible, to establish a universal system of training in pistol marksmanship which will cover all cases - one that can be adapted to each shooter's technique or special need. Training pistol shooters requires an individual approach. There is no single pattern or system for the organization of training that will entirely meet the individual requirements of all competitors, nor can one ever be expected. This is the reason knowledgeable coaches take the peculiarities of an individual - such as experience, degree of preparation and fitness, and other items - into account. They use these, and by relying on their own experience, devise a training program which allows special consideration for each shooter's capabilities. In spite of the difference in details, technique or method, there is much that is common to the training of advanced marksmen, that - in the opinion of leading coaches and shooters, applies to everyone, without exception. This manual endeavors to present, in a detailed, comprehensive manner, these universal applications.
