## **ECRM2015-Proceedings of the 14th European Conference on Research Methods 2015**

Jan 02 2021  
Complete proceedings of the  
14th European Conference on  
Research Methodology for  
Business and Management  
Studies Valletta, Malta  
Published by Academic  
Conferences and Publishing  
International

*Proceedings of the 2nd  
International Conference on  
Languages and Arts across*

*Cultures (ICLAAC 2022)* Mar  
24 2020 This is an open access  
book. The 2nd International  
Conference on Languages and  
Arts across Cultures (ICLAAC)  
aims to provide a venue for  
lecturers, teachers,  
researchers, as well as  
language and art professionals  
to share their insights,  
experiences, and ideas. This  
conference will also bridge the  
knowledge gap by presenting  
their works on languages and  
arts issues. The event will

provide limitless resources and  
opportunities to interact with  
prominent scholars in this field  
worldwide. This will allow us to  
significantly expand our  
existing global network. The  
conference theme will give us a  
better understanding of  
humans through languages and  
arts. The development of  
cultural value occurring in  
today's global communities is  
certainly a stimulant for artist  
and language users in creating  
their artifacts. Restoring cross-

cultural understanding is a bridge to understanding the complexities of language, culture, and the role of art in them. Cross-cultural understanding refers to people's attempts to understand one another, particularly between people of different cultural backgrounds. Significant cultural and artistic creations are incorporated into a language that promotes scholarly debate and scientific comprehension. As an attempt to minimize the spread of covid-19 virus, the conference presenters will be invited to present their papers online via zoom.

### **Information and Communication**

[artisanchocolates.ca](http://artisanchocolates.ca)

**Technologies in Education, Research, and Industrial Applications** Apr 24 2020 This book constitutes the thoroughly refereed proceedings of the 9th International Conference on Information and Communication Technologies in Education, Research, and Industrial Applications, held in Kherson, Ukraine, in June 2013. The 18 revised full papers presented were carefully reviewed and selected from 125 submissions. The papers are organized in topical sections on systems, infrastructures, and integration; semantics, knowledge engineering and management; ICT in teaching methodologies and didactics;

model-driven software development and verification. ICT Education Oct 11 2021 This book constitutes the refereed proceedings of the 50th Annual Conference of the Southern African Computer Lecturers' Association on ICT Education, SACLA 2021, held in Johannesburg, South Africa in July 2021. The 9 revised full papers presented were carefully reviewed and selected from the 23 submissions. One invited paper was also included in this volume. The papers are organized in following topical sections: past, present and future; teaching innovation; teaching methods and strategies. OCR AS GCE Applied ICT

Double Award Jan 26 2023

Exactly what you need for the AS Level GCE Double Award in Applied ICT for OCR - this student book matches the specification and provides all information needed for the double award.

**ASME Technical Papers** Jun 26 2020

The Labyrinths of Information

Jul 08 2021 This work takes an unusual approach to the use of information and communication technologies. The author uses metaphors such as 'bricolage' and 'gestell' to place a concern for human existence and our working lives at the centre of the study of ICTs and their use.

**Open IT-Based Innovation: Moving Towards**

**Cooperative IT Transfer and Knowledge Diffusion** May 06

2021 th The 11 Working Conference of IFIP WG 8.6, Open-IT Based Innovation: Moving Towards Cooperative IT Transfer and Knowledge Diffusion, organized in Madrid in October 22-24, 2008, follows

the series started in Oslo in 1995 and continues in the footprints of the past year's conference in Manchester. This year, although the Madrid Conference addresses the usual topics covered in previous WG8.6 conferences, the emphasis is on the issue of open innovation and its relationships with technology transfer and diffusion in the field of information technology. This issue is deeply modifying the way that knowledge is generated, shared, transferred, diffused, and used across the world as a side effect of globalization. It affects the organizational structure, partnerships, roles assumed by stakeholders, and technology

transfer and diffusion models and instruments. Industry, academia, and governments are simultaneously concerned. Although the concept applies to all industrial sectors, IT companies were early innovators. The analysis of the contents of this book allows the identification of some trends in technology transfer and diffusion issues as a part of the innovation process. The same problem is addressed in very different ways and extrapolation is not straightforward. Even innovation terminology is not clearly shared by different subcultures in the field.

Algorithms for Communications Systems and their Applications

Feb 03 2021 This volume presents the logical arithmetical or computational procedures within communications systems that will ensure the solution to various problems. The authors comprehensively introduce the theoretical elements that are at the basis of the field of algorithms for communications systems. Various applications of these algorithms are then illustrated with particular attention to wired and wireless network access technologies. \* Provides a complete treatment of algorithms for communications systems, rarely presented together \* Introduces the theoretical background to digital

communications and signal processing \* Features numerous applications including advanced wireless modems and echo cancellation techniques \* Includes useful reference lists at the end of each chapter Graduate students in the fields of Telecommunications and Electrical Engineering Researchers and Professionals in the area of Digital Communications, Signal Processing and Computer Engineering will find this book invaluable.

Transparency and Opaqueness in the Chinese ICT Sector Sep 10 2021 This paper critiques the current Chinese corporate governance framework and the

OECD Corporate Governance Principles on which the Chinese framework is largely based through detailed analysis of public disclosures by four prominent Chinese internet and communications technology (ICT) firms. These include State-controlled firms (China Telecom & China Mobile), mixed ownership (ZTE), and privately-controlled firms (Huawei Technologies). The paper argues that neither Chinese nor international corporate governance norms deal adequately with the complex group structures that are so common among large Chinese firms. It also reveals deficiencies in the rules on independent directors,

supervisory committees, and Chinese Communist Party committees as they are applied by Chinese ICT firms. The paper concludes with reform proposals that would provide more useful information and better protection to outside investors and public stakeholders in the unique Chinese corporate environment.

Exactly what you need for the AS Level GCE Single Award in Applied ICT for OCR - this student book matches the specification and provides all information needed for the single award.

*Blended Learning: Aligning Theory with Practices* Nov 12

2021 This book constitutes the refereed proceedings of the 9th International Conference on Blended Learning, ICBL 2016, held in Beijing, China, in July 2016. The conference is formerly known as International Conference on Hybrid Learning (ICHL) The 34 papers presented were carefully reviewed and selected from 61 submissions. The selected papers cover various aspects on collaborative and interactive learning, content development, open and flexible learning, assessment and evaluation, pedagogical and psychological issues, experience in blended learning, and strategies and solutions.

*wise 52 Solved Papers (2020 to 2004) 2nd Edition* Feb 21 2020  
ICT Practitioner Skills and Training May 26 2020 "This work focuses on the situation in the banking and finance industry with particular reference to needs and job profiles in the ICT (information and communications technology) in Italy and France."--P. 9.

### **Information and Communication**

**Technologies in Nigeria** Aug 29 2020 In recent years, information and communication technologies (ICTs) have been linked with socioeconomic development with the assumption that they can be harnessed for economic

growth in developing countries and facilitate integration into the global information society. However, very few studies in the ICT-for-development field examine the direct connections between ICTs and socioeconomic growth. *Information and Communication Technologies in Nigeria: Prospects and Challenges for Development* is a compelling account of the development of ICTs in Nigeria. It examines the ICT policy framework and the societal context within which application of the technologies emerged and highlights the potentials of ICTs in socioeconomic development. However, this book also

demonstrates, through interviews and case studies, that ICTs are not the panacea to underdevelopment; constraining factors in different countries can limit their capacity to succeed. The author employs a rare multidisciplinary approach that makes the book appealing and accessible to a diverse range of readership.

*Applied ICT GCSE* Feb 27 2023 This textbook should provide the underpinning knowledge for both Foundation and Intermediate GCSE students at Part One level.

GCE AS Applied ICT (Edexcel) Units 1-3 Nov 24 2022 This book uses an easy-to-follow, step by step approach which

focuses on helping students to learn the practical skills needed for success in AS Applied ICT.

### China's Information Revolution

Jul 28 2020 Since 1997 China has devoted considerable resources to ICT development. It now has the world's largest telecommunications market, and its IT industry has been an engine of economic growth; growing two to three times faster than GDP. E-government has achieved significant results and the private sector uses ICT. The 10 year mark is thus a good time to update the policy to reflect the changing needs of China's evolving economy so that it can meet the challenges of

industrialisation, urbanisation, upgraded consumption and social mobility. This publication is the result of an 18 month study by a World Bank team that draws on background papers by Chinese researchers, local case studies and experience from other countries.

### **Emerging Economic Models for Global Sustainability and Social Development**

Jan 22 2020 Change is an inevitable aspect of human life. As time goes by, certain processes and ways of doing things become inadequate. When it comes to economic systems, there is a need to review current models and revise them to meet new global demands in both

developed and developing nations. Emerging Economic Models for Global Sustainability and Social Development is an essential reference source that discusses economic, political, and social environments in the modern age, as well as economic development in an era of global hyper-competition, dwindling natural resources, and a growing global skills gap. Featuring research on topics such as monetary policy, economic theory, and rural poverty, this book is ideally designed for business managers, policymakers, government officials, researchers, academicians, and upper-level students seeking

coverage on theoretical and empirical models in economic behavior.

ICT Practitioner Skills and Training Dec 13 2021 Recoge:

1. The automotive industry in Europe - 2. ICT skills and training in production and their relevance for qualifications - 3. ICT skills and training in vehicle repair and sales and their relevance for the qualification - 4. Profiles and training fields for ICT practitioners in the automotive industry - 5. General guidelines for curricula development - 6. Summary and conclusions.

**Research on E-Learning and ICT in Education** Aug 21 2022 This volume includes contributions based on selected

full papers presented at the 11th Pan-Hellenic and International Conference "ICT in Education", held in Greece in 2018. The volume includes papers covering technical, pedagogical, organizational, instructional, as well as policy aspects of ICT in Education and e-Learning. Special emphasis is given to applied research relevant to the educational practice guided by the educational realities in schools, colleges, universities and informal learning organizations. This volume encompasses current trends, perspectives, and approaches determining e-Learning and ICT integration in practice, including learning and

teaching, curriculum and instructional design, learning media and environments, teacher education and professional development. It is based on research work originally presented at the conference, but the call for chapters was open and disseminated to the international community attracting also international contributions.

**Computer Support Collaborative Learning Practices** Apr 17 2022

**AQA AS GCE Applied ICT Double Award** Apr 29 2023

Exactly what you need for the AS Level GCE Double Award in Applied ICT for AQA - this student book matches the

specification and provides all information needed for the double award.

**Folens GCSE Applied ICT** Jul 20 2022

*Encyclopedia of Gender and Information Technology* May 18 2022 "This two volume set includes 213 entries with over 4,700 references to additional works on gender and information technology"-- Provided by publisher.

*Advances in Panel Data Analysis in Applied Economic Research* Jan 14 2022 This proceedings volume presents new methods and applications in applied economic research with an emphasis on advances in panel data analysis. Featuring papers presented at

the 2017 International Conference on Applied Economics (ICOAE) held at Coventry University, this volume provides current research on econometric panel data methodologies as they are applied in microeconomics, macroeconomics, financial economics and agricultural economics. International Conference on Applied Economics (ICOAE) is an annual conference that started in 2008 designed to bring together economists from different fields of applied economic research in order to share methods and ideas. Applied economics is a rapidly growing field of economics that combines economic theory with

econometrics to analyse economic problems of the real world usually with economic policy interest. In addition, there is growing interest in the field for panel data estimation methods, tests and techniques. This volume makes a contribution in the field of applied economic research in this area. Featuring country specific studies, this book will be of interest to academics, students, researchers, practitioners, and policy makers in applied economics and economic policy.

**Edexcel AS GCE Applied ICT Double Award** Oct 23 2022 Offering you complete choice whatever your needs for the new GCE Exactly what you

need for the new GCEs in ICT with books matching each specification and providing all information needed for either the single or double award. The only books matched to every type of course students can take - whether it is a single award or double award, with Edexcel, OCR or AQA. The theory is linked to real IT industry practices so that students feel engaged and motivated. Each book is written by an experienced author team to give tutors absolute confidence in the quality of the content. The colourful clear design and lay-out allows students to easily access the material. Clearly differentiated assessment activities make it

easy for students to work to a particular level. *ICT for You* Apr 05 2021 specifically for AQA, this teacher support pack provides advice and assistance on how to approach the Applied ICT GCSE Double Award. Each pack contains: information on how to prepare students for external assessment and how to assist them in preparing their portfolios; induction material, teacher notes and a glossary of key terms; guidance on selected case study questions; lesson plans and strategies for teaching the new course; exercises and activities that reinforce the underpinning knowledge; and a useful Web links page.

Towards a Sustainable Information Society Oct 31 2020 This book represents an important voice in the scientific discourse on what constitutes a sustainable information society, and provides a new comprehensive and forward-looking approach to such a development. This approach is based on the adoption of information and communication technologies (ICTs) by the main stakeholders of society, including individuals, enterprises, and public administration, who should use ICTs in order to build the welfare of present and future generations, ensure economic growth and socio-cultural

development, increase participation in public life, permit personal development, and build the wisdom of society. As such, the book mainly focuses on the role ICTs play in transforming business, public administration and everyday life in the context of the sustainable information society. This volume will appeal to both researchers and practitioners, as it provides significant areas and directions for research on the sustainable information society, and suggests important issues for programming, building and adopting such a society. The book will allow the reader to answer such critical contemporary questions as

‘What is the sustainable information society and what role is played by ICTs in this society?’; ‘What are the challenges and tasks of people, enterprises, and public administration that lead towards the sustainable information society?’; ‘How can ICTs support people, enterprises, and public administration in programming, building and adopting such a society?’; ‘What are the factors affecting ICT adoption by people, enterprises, and public administration in this context?’; ‘What are the areas that should require a primary focus in order to achieve the most satisfying results of ICT

adoption by people, enterprises, and public administration?’; and ‘How can ICT adoption by people, enterprises, and public administration be measured here?’

*Virtual Learning* Jun 07 2021

Since the early 1980s, successive governments have realized the importance of computers and computing and made significant investment in schools. The most recent initiative, the National Grid for Learning, seeks to place online learning facilities at the heart of the curriculum for both teachers and students, and use it as a vehicle for lifelong learning. The impact of ICT in the classroom transforms

management, organization and conventional pedagogic approaches. However, many teachers still struggle with ICT in the classroom.

**Electronic Governance and Open Society: Challenges in Eurasia** Sep 29 2020 This book constitutes the refereed proceedings of the 5th Conference on Electronic Governance and Open Society: Challenges in Eurasia, EGOSE 2018, held in St. Petersburg, Russia, in November 2018. The 36 revised full papers were carefully reviewed and selected from 98 submissions. The papers are organized in topical sections on smart city infrastructure, policy; digital privacy, rights, security; data

science, machine learning, algorithms, computational linguistics; digital public administration, economy, policy; digital services, values, inclusion; digital democracy, participation, security, communities, social media, activism; social media discourse analysis; digital data, policy modeling; digital government, administration, communication.

*ICT in Agriculture (Updated Edition)* Dec 21 2019

Information and communication technology (ICT) has always mattered in agriculture. Ever since people have grown crops, raised livestock, and caught fish, they have sought information from

one another. Today, ICT represents a tremendous opportunity for rural populations to improve productivity, to enhance food and nutrition security, to access markets, and to find employment opportunities in a revitalized sector. ICT has unleashed incredible potential to improve agriculture, and it has found a foothold even in poor smallholder farms. *ICT in Agriculture, Updated Edition* is the revised version of the popular *ICT in Agriculture e-Sourcebook*, first launched in 2011 and designed to support practitioners, decision makers, and development partners who work at the intersection of ICT and agriculture. Our hope is

that this updated Sourcebook will be a practical guide to understanding current trends, implementing appropriate interventions, and evaluating the impact of ICT interventions in agricultural programs.

*A Collection of Papers on Chaos Theory and Its*

*Applications* Feb 15 2022 This current volume contains 12 new papers on the subject of chaos in the physical sciences, which was initiated with the publication of the book *Research Advances in Chaos Theory*. It is clear the subject continues to attract a great deal of attention among scientists in the scientific community. This volume looks at such problems as chaos in

nonlinear systems, in dynamical systems, quantum chaos, biological applications, and a few new emerging areas as well.

*Advances and Trends in Artificial Intelligence. From Theory to Practice* Dec 01 2020

This two-volume set of LNAI 12798 and 12799 constitutes the thoroughly refereed proceedings of the 34th International Conference on Industrial, Engineering and Other Applications of Applied Intelligent Systems, IEA/AIE 2021, held virtually and in Kuala Lumpur, Malaysia, in July 2021. The 87 full papers and 19 short papers presented were carefully reviewed and selected from 145 submissions.

The IEA/AIE 2021 conference will continue the tradition of emphasizing on applications of applied intelligent systems to solve real-life problems in all areas. These areas include the following: Part I, Artificial Intelligence Practices: Knowledge discovery and pattern mining; artificial intelligence and machine learning; semantic, topology, and ontology models; medical and health-related applications; graphic and social network analysis; signal and bioinformatics processing; evolutionary computation; attack security; natural language and text processing; fuzzy inference and theory; and sensor and communication

networks Part II, From Theory to Practice: Prediction and recommendation; data management, clustering and classification; robotics; knowledge based and decision support systems; multimedia applications; innovative applications of intelligent systems; CPS and industrial applications; defect, anomaly and intrusion detection; financial and supply chain applications; Bayesian networks; BigData and time series processing; and information retrieval and relation extraction

**A Modern Approach to Product Portfolio Management for the ICT-Industry** Mar 04 2021

[artisanchocolates.ca](http://artisanchocolates.ca)

Portfolio management in general is a widely spread and highly accepted topic in the management literature and in practice. Its origins go back to Markowitz and the early 1950s focussing financial assets. Soon, this concept was broadly applied to multiple economic disciplines such as strategic management, marketing, product management, resource management, real estate management, innovation management and many more. Numerous portfolio management approaches, instruments and tools have been developed and are applied in practice a well. This paper provides basics and an overview of product portfolio

management covering theory and practice. Specific attention is paid to process oriented approaches. A number of publications identify a significant gap between practical needs and academic support when it comes to solving practitioners' problems especially in highly dynamic environments such as the Information and Communication Technology (ICT) industry. This paper intends to bridge this gap by outlining a pragmatic approach to product portfolio management with a focus on the specific needs of the ICT-industry without losing connect to worthy findings of academic research. Still, this

approach needs to be adjusted to the individual situation of company, however, suggested processes and tools allow for such customization.

### **Methods and Technologies for Learning**

Jun 19 2022 For more than a decade the rapid growth of ICT and its use in education have generated a lot of changes in traditional educational structures as well as interest in defining new models for designing advanced learning solutions. This book provides an overview of international perspectives regarding the latest innovations and results in different fields of education. In particular, it is addressed to all those who are interested in

exploring methodologies and extending their knowledge of current research in education and training technologies. The wide variety of contributions provides an interesting and useful account of some of the major issues and controversies facing researchers, academicians, professors, educational scientists and technologists in most of the educational contexts in which ICT is applied. Over 90 papers are featured and these are divided under headings including: Online Education and Training; Innovative Teaching and Learning Technologies; Collaborative Learning Environments; Navigation Strategies and

Comprehension; Mobile Learning; Quality Issues of Distance Learning Processes; Knowledge Management and E-learning; Learning Technologies for Primary and Secondary Schools; Educational System for People with Special Needs.

### AQA AS GCE Applied ICT Single Award

Dec 25 2022 Exactly what you need for the AS Level GCE Single Award in Applied ICT for AQA - this student book matches the specification and provides all information needed for the single award.

**Information and Communication Technology for Peace** Aug 09 2021 This report from ICT4Peace project

describes the background to the project before presented

some selected examples of how information technology has

been used for the prevention of conflict and aid with recovery.
