The real estate professional needs to be aware of the accounting rules for real estate, in order to avoid adverse reporting outcomes. Real Estate Accounting covers the accounting rules for every type of real estate transaction, which can be used to structure real estate deals appropriately. The book covers the accounting for real estate sales, property exchanges, time-share intervals, and property management. It also reveals the related financial statement presentations and accompanying disclosures. In addition, it describes the accounting related to the rental of property and investments in real estate ventures. In short, this book is the go-to reference for discerning the proper accounting treatment for a real estate transaction. Helping Students Build a Solid Financial Accounting Foundation This text is designed to provide students with the best tools and resources to understand accounting. Financial Accounting introduces the financial statements and the conceptual framework that underlies them in Chapter 1, and builds on this foundation throughout the remaining 12 chapters. The concepts and procedures that form the accounting cycle are also described and illustrated early in the text (chapters 2 and 3) and are then applied consistently in the chapters that follow. By introducing financial accounting's most critical concepts and procedures early in the book and then repeatedly applying them in the context of new material in later chapters, students will finish the textbook with a sound grasp of introductory financial accounting principles.
