Self-Action Leadership (Volumes 1 and 2) provides the first, and only, books of their kind in the academic world today. This two volume set single-handedly carves out a new and unique scholarly niche by providing the first comprehensive and secular manual to holistically address society's universal need for personal leadership and character education. Its single-minded aim is the global promotion and proliferation of leadership, character, and life skills education in nations, communities, organizations, schools, homes, and individual lives everywhere. The concept of Self-Action Leadership (SAL) is rooted in 30 years of extensive research spanning the fields of self-leadership, leadership, action research, character education, and autoethnography. In addition to drawing on the scholarship of these extant fields, SAL simultaneously builds upon them by introducing an original theory and model that executives, administrators, scholars, teachers, and practitioners alike can universally utilize to their own advantages and to the benefit of their colleagues, subordinates, and students. Volume I—The Self-Action Leadership Theory—contains prefacing material for the combined texts. It also includes the first four book sections of the two volume set. This invaluable volume set of Advances in Geosciences continues the excellent tradition of the Asia-Oceania scientific community in providing the most up-to-date research results on a wide range of geosciences and environmental science. The information is vital to the understanding of the effects of climate change, extreme weathers on the most populated regions and fastest moving economies in the world. Besides, these volumes also highlight original papers from many prestigious research institutions which are conducting cutting edge studies in atmospheric physics, hydrological science and water resource, ocean science and coastal study, planetary exploration and solar system science, seismology, tsunamis, upper atmospheric physics and space

About the Author Victor Ashiedu has over 17 years in the IT industry. He worked extensively with Microsoft technologies including Windows desktop and Server Operating Systems. Victor is currently the Lead Editor of one of the fastest growing tech websites - **Itechguides** **Astronomy and Astrophysics Abstracts**, which has appeared in semi-annual volumes since 1969, is devoted to the recording, summarizing and indexing of astronomical publications throughout the world. It is prepared under the auspices of the International Astronomical Union (according to a resolution adopted at the 14th General Assembly in 1970). **Astronomy and Astrophysics Abstracts** aims to present a comprehensive documentation of literature in all fields of astronomy and astrophysics. Every effort will be made to ensure that the average time interval between the date of receipt of the original literature and publication of the abstracts will not exceed eight months. This time interval is near to that achieved by monthly abstracting journals, compared to which our system of accumulating abstracts for about six months offers the advantage of greater convenience for the user. Volume 18 contains literature published in 1976 and received before March 1, 1977; some older literature which was received late and which is not recorded in earlier volumes is also included. The 13th edition of this bestselling book is proof of the success of Mary Blewitt's concise and clear style in explaining a particularly difficult skill, and it has been the bible for many generations of ocean navigators. Since this book was first published, the huge advances in electronic navigation have transported most offshore navigators to a world of press-button convenience. However, there is still a vital need for traditional skills when things go wrong: batteries can fail, aerials go overboard, and electronics have been known to get wet. A bestseller for over 65 years, **Celestial Navigation for Yachtsmen** is a model of simplicity and clarity. The worked examples require only straightforward addition and subtraction, which explains why this book has truly earned its reputation for admirable conciseness and for making a tricky subject easy to understand. This edition has been thoroughly revised by Andy Du Port, the highly respected ex-editor of **Reeds Almanacs**. "The "bible" of navigation for generations of yachtsmen... worth its weight in gold" **Sailing** The first three novels in the **Atlantis Legacy**. Some secrets are buried for a reason. She's about to uncover the deadliest secret of all... Anxious and reclusive, Cora Blackthorn uses online gaming as her sole tether to the outside world. But when her mom sends home a cryptic SOS in the form of a mysterious package, Cora discovers the shocking truth behind her extraordinary affliction. Her condition isn't an illness; it's a gift not of this world.

Armed with a powerful, alien amulet and her mother's journal, Cora heads to Rome on a desperate rescue mission. But on the way, she discovers that a secret society is hot on her trail, and she has no chance of outrunning them. Her only chance is to confront them head on. A clash within the twisty catacombs beneath Vatican City leaves Cora with a perilous choice: find her way through an ancient, deadly labyrinth and save her mom, or fail and die... They seem the very ones who would drink refreshment and courage from the fountain of feminine sympathy; they are the very ones who forego it. Why? The question is unanswerable. Perhaps some early slight to vanity, some never forgotten wound dealt by a thoughtless feminine hand, has sunk its sting of doubt and distress into their mind. Perhaps they know that in them lies a capability for morbid suffering of which woman holds the key. They prefer safety to danger. Somewhat cowardly, they hug the shores, and are contented that their male friends should hoist the sail and woo the winds. Hamilton Darrell, when at college, was not known to have a girl or woman friend. He certainly had no mistress. Yet he was no woman hater. On the contrary, he respected women and could make himself sufficiently agreeable to them. But he did not give himself to their pursuit. They, on their part, met him, if civilly, with indifference. There is a certain form of moral superiority in men which women secretly resent. This Darrell possessed. All the romance that inspired his nature, all the desire. To look up and reverence, all the ambition for another's success which seems a part of well-balanced characters, he bestowed on a male comrade. He seemed to find sufficient pleasure in the triumphs of his friend. Somewhat weak of frame, unblest with physical beauty, insignificant in person, he seemed to warm himself in the rays of Hazard Thorne's vitality. Hazard, an 5071 prince, allowed himself to be admired. The young men had rooms together in Cambridge, apartments fitted up with elegance, not to say luxury, and were - one by reason of his dominant personality, the other of his wealth - leaders of their particular set. A concentrated study of the relationships between modernism and transformative left utopianism, this volume provides an introduction to Marx and Marxism for modernists, and an introduction to modernism for Marxists. Its guiding hypothesis is that Marx's writing absorbed the lessons of artistic and cultural modernity as much as his legacy concretely shaped modernism across multiple media.
