Providing a comprehensive overview of two centuries of international civil servants and international secretariats, this book reveals how international secretariats have emerged and evolved, focusing on both structures (international public administrations) and the practitioners (international civil servants). Reinalda explores the history and development of international secretariats and international civil servants, starting with the Congress of Vienna (1814–1815), when the first international organization was established in the form of a river commission for the navigation of the Rhine. Charting the development of international secretariats through the nineteenth century – the League of Nations, the United Nations, and the United Nations System with its many specialized agencies, the author

explains why NATO (North Atlantic Treaty Organization) and the OECD (Organisation for Economic Co-operation and Development) have strong, rather than weak, international secretariats, and shines a light on the registries of international courts and tribunals. The book fills a gap in the literature by exploring the full evolution of international secretariats, covering global and continental developments as well as regional integration practices around the world. Secretariats have become the leading actors in multilateral diplomacy particularly for dealing with complex issues, and this book will be of interest to all scholars of global governance and practitioners working for a range of international organizations. This second volume of *The Official History of the British Civil Service* explores the radical restructuring of the Civil Service that took place during the Thatcher and Major premierships from 1982 until 1997, after a period of confusion and disagreement about its future direction. The book brings a much-needed historical perspective to the development of the 'new public management', in which the UK was a world-leader, and considers difficult questions about the quality of democratic governance in Britain and the constitutional position of its Civil Service. Based on extensive research using government papers and interviews with leading participants, it concentrates on attempts to reform the Civil Service from the centre. In doing so, it has important lessons to offer all those, both inside and outside the UK, seeking to improve the quality, efficiency and accountability of democratic governance. Particular light is shed on the origins of such current concerns as: The role of special advisers The need for a Prime Minister's Department The search for cost efficiency Accountability to Parliament and its Select Committees Civil Service policy-making capacity and implementation capability. This book will be of much interest to students of British history, government and politics, and public administration. Savage (history, St. Mary's College, Maryland) historically examines the emergence of the civil servant class in Britain, and its influence in official policy matters. She analyzes the social origins and career patterns of high level civil servants as a social construction of power affecting four social service ministries formulating policy between the world wars: the Board of Education, the Ministry of Agriculture, the Ministry of Labour, and the Ministry of Health. Abstract: Abstract of thesis entitled "China's Civil Service Reform and Local Government Performance: A Principal-Agent Perspective" Submitted by Wang Xiaoqi for the Degree of Doctor of Philosophy at The University of Hong Kong May 2006 This dissertation has examined the impacts of China's Civil Service Reform on the performance of government agencies in charge of environmental protection and education in three cities (Haidian district of Beijing, Changchun, and Ningbo). I have explored China's Civil Service Reform and its impact on local government performance within a principal-agent framework. Because of information asymmetry and conflict of interest, bureaucratic superiors on three hierarchical levels within the old Cadre Management System had trouble in obtaining full compliance from their bureaucratic subordinates. But, being rational, the bureaucratic superiors (especially the central leadership of the Chinese Communist Party) design rules and institutions to mitigate the problems. The introduction of China's Civil Service System in 1993 is one such effort to manage cadres. The crucial outputs and outcomes of China's Civil Service Reform are the major focus of this study. In particular, this dissertation aims to answer the following related questions. How have the new sets of rules or initiatives shaped the incentives facing the civil servants and thus influenced the way they exercise their discretion (this being the managerial goal of the reforms)? How do the Reforms affect the ability of the Chinese leadership to control the bureaucracy (the political goal of the reforms), and what are the implications of the Reforms for the relationships among the political leadership, the bureaucrats, and the citizens? How might we explain the variations in reform implementations and performance across policy areas and regions after China's adoption of the Civil Service System? I find that components of China's Civil Service Reform provide superior solutions to alleviate the control problems, which were embedded in three hierarchical levels of Chinese government, through incentive-alignment and information discovery. The alleviations of control problems manifest themselves in the improvement of local government performance, which is measured by objective indicators and citizen survey data in this study. In general, I find the managerial and political objectives of China's Civil Service Reform have been met. As the outputs of the reforms, evidence suggests civil service quality has improved and local governments have adopted and implemented China's Civil Service System to a large extent. Moreover, the implementation of China's Civil Service System has motivated the civil servants to put more conscious effort into their work and accordingly adjust the way they treat their clients. Referring to the outcomes of the reforms, the implementation of the components of China's Civil Service System and other administrative monitoring mechanisms has helped the central leadership in China to successfully strengthen control over the local governments and the local bureaucrats. The strengthened control of the bureaucracy has manifested itself in better provision and delivery of public services, which in turn leads to increased citizen satisfaction with regard to government performance. All these illustrate that local government The Crown's Servants is a major new study of English central government and the royal court from the Restoration of the monarchy in 1660 to the death of Charles II in 1685. A sequel to the

author's two earlier studies, of royal officials under Charles I (1625-1642) and office-holders under the Commonwealth and the Cromwellian Protectorate (1649-1660), it sets out to explore the extent to which the restoration of the monarchy undid the changes brought about under the Republic. The author looks at the institutions of government, its methods and procedures, the terms and conditions of service, and its personnel both collectively and individually. He considers the policies, tasks, successes, and failures of the regime, and relates these to the process of state formation and to the impact of the state on society. This is both the culmination of a lifetime's work and a crucial contribution in its own right to the history of seventeenth century England and the development of English government. The Canal Maintenance Shop Supervisor II Passbook(R) prepares you for your test by allowing you to take practice exams in the subjects you need to study. This first volume of the Official History of the UK Civil Service covers its evolution from the Northcote-Trevelyan Report of 1854 to the first years of Mrs Thatcher's government in 1981. Despite current concerns with good governance and policy delivery, little serious attention has been paid to the institution vital to both: the Civil Service. This Official History is designed to remedy this by placing present problems in historical context and by providing a helpful structure in which others, and particularly former officials, may contribute to the debate. Starting with the seminal 1854 Northcote-Trevelyan Report, it covers the 'lost opportunity' of the 1940s when the Service failed to adapt the needs of 'big government' as advocated by Beveridge and Keynes. It then examines, in greater detail, the belated attempts at modernisation in the 1960s, the Service's vilification in the 1970s and the final destruction of the 'old order' during the first years of Mrs Thatcher's government. Particular light is shed on the origins of such current concerns as the role of special advisers the need for a Prime Minister's Department the evolution of Parliamentary Select Committees to resolve the potential tension between bureaucracy and Parliamentary democracy. This Official History is based on extensive research into both recently released and unreleased papers as well as interviews with leading participants. It has important lessons to offer all those, both inside and outside the UK, seeking to improve the quality of democratic government. This book will be of great interest to all students of British history, British government and politics, and of public administration in general. The Business Officer II Passbook(R) prepares you for your test by allowing you to take practice exams in the subjects you need to study. It provides hundreds of questions and answers in the areas that will likely be covered on your upcoming exam, including but not limited to: understanding and interpreting tabular material; preparing reports and documents; analyzing and evaluating information; working and interacting with others; administrative supervision; and more. Four letters from a "war mother" and new employee of the Fourth U.S. Civil Service Region, to her friend, with descriptions of daily life in the Washington metropolitan area and details about the work world and family finances. Includes a description of the Atlantic Building at 10th and F streets NW. THE OTTAWA MEN explores the family, social, and political links that bound together an influential group of men that held sway during the time of the King and St. Laurent governments. Based on extensive research, interviews with the individuals themselves, and with the politicians they served, this first-rate history is once again available to the public. 22 photos.
